

# FOOD MICROBIOLOGY:

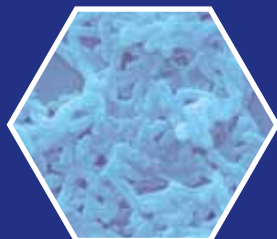

## Current issues on safety and quality

This specialist interactive course is relevant to all Technical Managers, Laboratory Heads and anyone involved in the delivery of safe foods of the highest quality.

Course will include:

- Pathogens currently of concern to the food industry
- Horizon scanning for future problematic microorganisms
- Strategies for controlling growth of microorganisms in foods – traditional and new approaches
- Enumeration and detection methods for specific microorganisms
- Hot topics identified by participants
- Case studies and practical demonstrations
